

MiniBull Logical Pro (cTrader cBot)

A fully automated multi-timeframe trend and false-breakout trading system.

MiniBull Logical Pro is a fully automated cTrader cBot combining multi-timeframe trend confirmation with moving-average reversal signals. It aligns Monthly and Weekly trend direction, detects Daily high/low breakout-and-return setups, then confirms entries with an ATR-based MA touch/reversal check across 7 timeframes (M15-D1) using SMA, EMA, or KAMA, with an optional non-repainting "confirm on bar close" mode.

Position size is auto-calculated from your risk % and ATR stop distance, with an always-on Disaster SL. Choose Time-based, 3-Stage partial close, or SL+Time exits, plus configurable N-Bar behavior (Always/Trail/SL-Guard).

Includes a live on-chart status panel, historical signal backfill for chart visualization, and full parameter control over entries, exits, and risk. Works on any Forex/CFD symbol with sufficient MN1/W1/D1 history; core logic was backtested on the M15 timeframe.

Pricing

Buy outright: **1700 USD**

1 Month: **49 USD**

3 Months: **85 USD**

6 Months: **140 USD**

1 Year: **440 USD**
