Minibull Logical Pro Indicator (cTrader)

Multi-timeframe trend and false-breakout indicator for cTrader.

Minibull Logical Pro is a multi-timeframe trend and false-breakout indicator. It combines Monthly (MN1) and Weekly (W1) close-based trend confluence into one Main Trend (Bullish only above both last-closed MN1 and W1; Bearish only below both), then watches Daily (D1) high/low for false breakouts.

When price breaks the previous D1 high or low and closes back inside the D1 range, it scans seven timeframes (M15, M30, H1, H4, H8, H12, D1) for a Moving Average reversal (SMA, EMA, or KAMA) inside an ATR touch zone, firing a BUY/SELL signal only if a timeframe confirms it and it does not fight the Main Trend.

A live panel shows MN1/W1/Main trend, D1 levels/ATR, price position vs D1 range, the MA table, and current signal. A proximity warning flags when price nears the MN1/W1 level, since a flip may be close. "Confirm Only On Bar Close" removes repainting.

Performs especially well on NAS100 (Nasdaq 100) M15, its original tuning target — fully configurable, works on any symbol/timeframe, live or backtest.

Pricing

Buy outright: **179 USD**
1 Month: **20 USD**
3 Months: **35 USD**
6 Months: **60 USD**
1 Year: **99 USD**
