

Minibull Sniper AMA (Robot)

A slope-confirmed AMA200/AMA9 trend-following EA for NAS100 and major indices.

Minibull AMA Sniper is a professional trend-following Expert Advisor optimized for NAS100 (Nasdaq 100). It is also compatible with US30 (Dow Jones), SPX500 (S&P; 500) and DAX40. The EA automatically detects your broker's symbol name — whether it is listed as NAS100, US100, NASDAQ100, USTEC, NQ100, US30, NYA30, NYSE30, SPX500, US500 or any other common variation — and adapts accordingly.

The strategy is built around two Adaptive Moving Averages — AMA(200) and AMA(9) — calculated on the Daily (D1) timeframe. Entry signals fire precisely on the close of each H1 candle for clean, noise-filtered execution.

How it works

- BUY: price closes above both AMA(200) and AMA(9)
- SELL: price closes below both AMA(200) and AMA(9)
- NEUTRAL: price between the two MAs — all positions closed

Slope Confirm (v8.0)

Price position alone no longer triggers a trade — the AMA's own slope must confirm the trend direction, otherwise the signal resets to NEUTRAL. Swing mode checks AMA200 slope only (5-bar lookback), while Scalp mode requires both AMA200 and AMA9 slope confirmation (3-bar lookback, stricter threshold), since it's far more exposed to whipsaws on lower timeframes. Slope direction is shown live on the dashboard with up/down/flat arrows, reducing false signals in flat/ranging markets.

Two Modes — One EA

SWING Mode (default): AMA(200) and AMA(9) calculated on the Daily (D1) chart. Signal triggers on H1 candle close. Designed for medium-term trend following. TP: 2000 USD, SL: 600 USD, Disaster SL: 1000 USD.

SCALP Mode: AMA(200) and AMA(9) calculated on the H1 chart. Signal triggers on M5 candle close. Designed for short-term momentum entries. TP: 200 USD, SL: 60 USD, Disaster SL: 500 USD.

Switch between modes with a single button click on the panel — the EA automatically reloads the correct AMA timeframes and resets risk parameters.

Risk Management

- Take Profit / Stop Loss adjustable live on dashboard

- Disaster Stop Loss: total open equity protection (hard account stop)
- Maximum daily trade cap
- Lot size configurable

Session Filter

NYSE / Nasdaq 09:30-16:00 ET with automatic US DST handling. Works with any broker via configurable GMT offset.

Dashboard Panel

- Live Mode, Direction, Signal, AMA values, Trades, P&L, Session status
- Previous Day High & Low displayed in real time
- TP / SL adjustable live via +/- buttons
- SWING / SCALP mode toggle button
- Hide / Show panel button for a clean chart view
- Auto / Manual mode toggle + manual BUY / SELL buttons
- Panel position, size and font fully customizable from Inputs

Multi-Timeframe S/R Lines

M1, M5, M15, M30, H1, H4, D1, W1 — all drawn simultaneously with TF labels (e.g. "H4 R", "D1 S"). Toggle on/off from the panel.

Compatible Symbols

Optimized for NAS100. Also compatible with US30, SPX500, DAX40 and other major indices.

Minimum recommended deposit: 1000 USD. Tested on: NAS100, M1, 100% real ticks, 2024.03-2026.06.

Past performance does not guarantee future results. Always test on a demo account before trading live.

Pricing

Buy outright: **1300 USD**

1 Month: **49 USD**

3 Months: **113 USD** (save 23%)

6 Months: **230 USD** (save 23%)

1 Year: **490 USD** (save 18%)
